Streamlined security in the palm of your hand.

You can't be everywhere at once, but our Remote Security Manager app can.

Our smart, intuitive mobile app gives complete control right from your device—no matter where you are. Easy to install and operate, it provides full flexibility for you to control and manage all aspects of your security systems—from arming and disarming, to silencing and clearing an active alarm, creating new app users, and custom naming each panel.
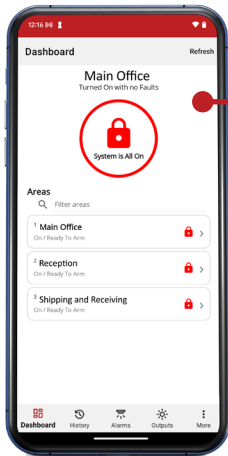

On or off site, you're always in control.

The features you want, when you want them.
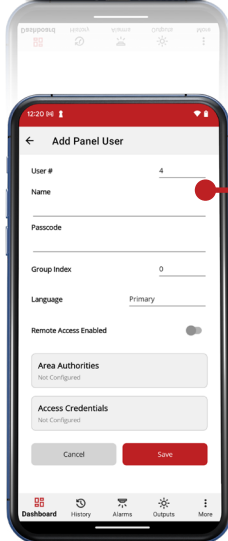

Just log in on any mobile device to…

- Arm or disarm your system remotely
- Control specific areas or bypass points
- Receive real-time push notifications
- Add, remove, or update user passcodes
- Lock or unlock doors
- Access live camera views supported by your security system, and more!

# Complete control of your security from anywhere.

Arm and disarm your system.

Whether you want to control your entire system, arm or disarm specific areas within your facility, or stay safe while working in the building after-hours — you can easily select the security level that meets your needs.

Add and delete users.

If you want to add a new employee or remove someone who left your organization, you can add, delete, or change passcodes directly from your smart phone. You can even authorize other users to use the RSM app from their phones.

Silence alarms.

It's now possible to silence and clear an alarm at your building while offsite. Simply log in and manage your system from any smartphone or tablet. You can even choose not to silence the alarm in an actual emergency.
