Access Management System credential tools

Access Management System (AMS) is a powerful access control software. It offers several web-based tools which can be used to easily and efficiently manage visitor and employee data as well as cards and mobile credentials.

Credential Management (included)

A browser based software that operates in tandem with Access Management System. The credentials can be either physical cards, or virtual cards sent to employees and sent to employee's mobile devices. This software is **included** in the Access Management System license.

	License	AMS-Lite	AMS-Enterprise	SMA
AMS Base * Includes Credential Management	License AMS Enterprise base	-	AMS-BBIS	AMS-SMA-BBIS
	License AMS Lite base	AMS-BLIT	-	AMS-SMA-LITE

Report Management (add-on)

With Report Management, you can easily create, manage, analyze and share reports on entries and exits in your building.

Visitor Management (add-on)

Effective visitor management must enhance building security, protect facilities and employees, and improve users' and visitors' overall experience. The easy-to-use, browser-based visitor management software offers all the benefits for enhancing the visiting process and integrates seamlessly with the Access Management System.

Mobile Access (add-on)

The integration of the Mobile Access solution streamlines and modernizes your access control system. It allows you to pre-assign access rights to your visitors, guests, employees, or service providers, enhancing security using a device we always carry with us – our smartphone.
