UNIFIED SECURITY. SIMPLIFIED.

Radionix intrusion panels integrated with Brivo Security Suite.

INTEGRATION OVERVIEW

The integration between Radionix B and G Series intrusion panels and the Brivo Security Suite delivers a unified security experience by bringing intrusion detection, access control, and video surveillance together within a single cloud-managed platform.

Through the Brivo web interface and mobile application, operators can arm and disarm intrusion areas, view panel and area status, receive alarm notifications, and investigate events without switching between multiple systems. By correlating intrusion alarms with video and access control activity, organizations can quickly verify threats, reduce false alarms, and improve operational efficiency across one or multiple sites.

KEY BENEFITS

Flexible Arming
Arm, disarm, and manage intrusion areas with flexible control options tailored to your security needs.

Monitoring
View system status, area activity, and alarm events in real time from a centralized interface.

Automation
Streamline daily operations through automated workflows.

Auditing
Maintain a complete event history with detailed reporting for compliance.

INTEGRATION REQUIREMENTS

The Radionix and Brivo integration supports compatible Brivo Security Suite environments and Radionix intrusion panels, enabling centralized monitoring, intrusion management, and streamlined security operations from a single platform.

Radionix Products:
B3512
B4512
B6512
B8512G
B9512G

Brivo Products:
Brivo Security Suite
Brivo Panels SDC, ACS300 and 6000MBE with firmware version 6.2.5.11 or above
Intrusion Feature Pack: B-FPACK-INTRUSION-1

VERTICAL MARKET APPLICATIONS

ABOUT BRIVO

Brivo is a global leader in cloud-native access control and unified physical security, offering modern solutions that help organizations secure buildings, manage identities, and streamline operations from anywhere. Its flagship Brivo Security Suite unifies access control, video intelligence, visitor management, and intrusion detection into a single, scalable platform enabling enterprises to strengthen security, improve compliance, and manage thousands of sites through one intuitive interface.

ABOUT RADIONIX

Radionix puts you in control of a seamless, always-on security network, uniting intrusion detection, access control, fire alarm and more. Whether on-site or remote, you can see what's happening, manage access and make decisions instantly while your security works quietly in the background to keep people, property and operations safe. Radionix, formerly a Bosch brand -- now an independent company, builds on trusted technology to deliver mission control for your security.
