Motion detectors

Easy to install

All motion detectors are designed with unique features to speed up the installation. These features also reduce installer errors that can lead to false alarms or missed detection, thus reducing service calls.

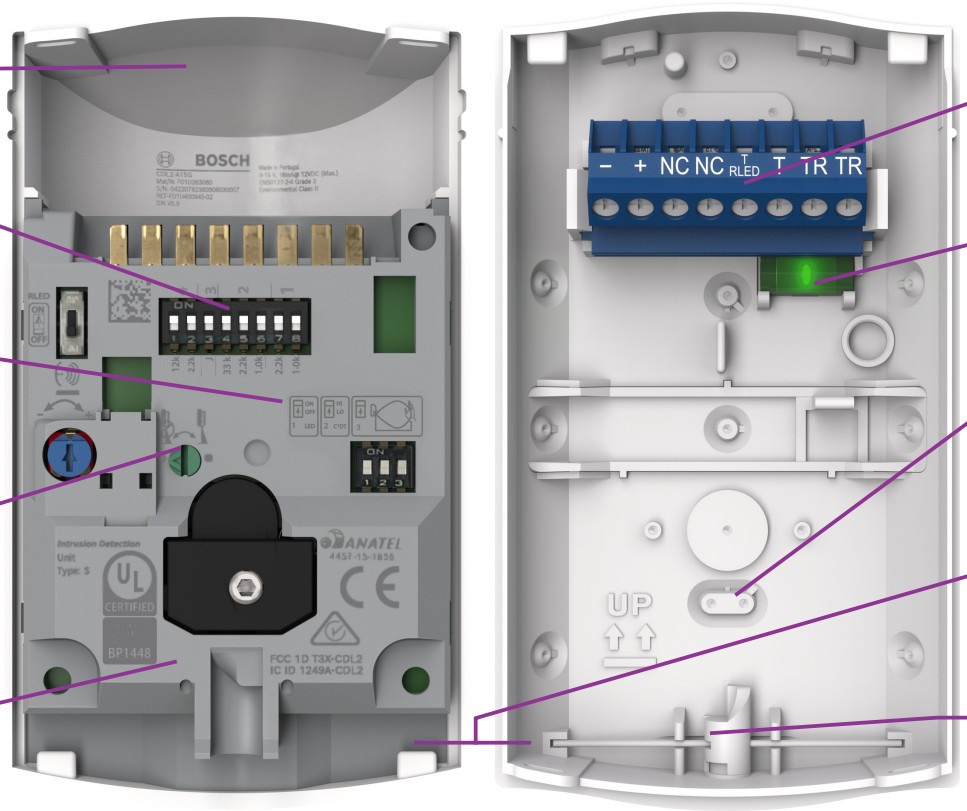
Enough space for cabling and resistors

Easy EOL resistor selection with dip switches**

Instructions directly on the detector for easy configuration

Look-down zone can be enabled / disabled with a simple turn of a screwdriver

Optics and electronics sealed behind a protective cover prevents damage during installation



Removable, terminal block with a 45 lift-gate for easy access to the terminals

Integrated bubble level for accurate placement

Flexible mounting height eliminates the need for onsite adjustments

Unique 2-piece design: no loose parts and no need to remove PCB to mount the detector

Self - locking mechanism, no screw or tool needed
